Dedication

**PAUL D. SCHREIBER
HIGH SCHOOL**

PORT WASHINGTON, LONG ISLAND, NEW YORK

Sunday, March 1, 1953

2:30 P.M.

A STATEMENT OF EDUCATIONAL PHILOSOPHY

In the Paul D. Schreiber High School our aim shall continue to be the development of each individual to the best and fullest extent which his inherent qualities permit. We must provide for the recognition and acceptance of the privileges and responsibilities involved in living and working in a democracy. The student should achieve a life of maximum satisfaction and richness along occupational, recreational, moral, and cultural lines. The school must cooperate with parents and community in the development of an individual who will be an intelligent, self-sufficient, and useful citizen. This new high school building has been provided by the citizens of Port Washington through their elected representatives, the Board of Education. It is our fond hope that this building includes those facilities needed for a broader and better education than has been possible in the past. It has long been our policy to plan the program of each individual student in line with his interests and needs, and in full cooperation with the desires of his parents. Now, for the first time, we have splendid facilities for well organized and complete courses of studies in several areas which are of interest to those students who are not planning to go to college. We are now in a position to offer carefully planned programs in practical arts and vocational subjects that will fully equal the curriculum planned primarily for college entrance. Within the present framework of the school we believe that any pupil can choose a program suited to his needs and one which will permit him to go forth with a justified sense of cultural, social, occupational, and civic competence.

Cafeteria Director: Janeth Wanzor

CUSTODIAL STAFF:

Fred Trend, Head Custodian
Joseph Connolly
Theodore Klick
Arthur La Bonte
Lillian Welsh, Matron

OUTSTANDING FEATURES OF THE BUILDING

There is a complete science department with ample laboratory space. A home-making unit includes four unit kitchens, foods laboratory, home-planning rooms, and clothes laboratory.

The commercial education department incorporates bookkeeping, typing, secretarial practice, retailing and business machine rooms.

The creative arts and industrial arts wing at the north end of the school represents an innovation in school planning.

Here are provided facilities for studying and producing plays, art work, musical shows, photography, and allied educational objectives.

Music is well planned for with a 34 by 36 foot band and choral practice room opening off the stage of the new auditorium.

The auditorium itself seats 680 persons in fixed seats on a sloping floor. It is the core of a unit which surrounds it with rooms for dramatic arts, speech, art, crafts, shops, and similar rooms.

Complete audio-visual facilities are provided. Shops include automotive repair, metal, electrical, woodworking, and printing

The new gymnasium will accommodate 1700 spectators for basketball, and a modern cafeteria will seat 300 persons. Both are planned for community, as well as school functions.
